

InceptionClaw

Your Super Assistant

WHAT IS INCEPTIONCLAW

A secure, enterprise super assistant helping you seamlessly move from information to action, built on OpenClaw.

Inception Claw surfaces insights from your tools and systems: Outlook, Microsoft Teams, Monday.com ElevenLabs, X and more. Your secure AI super-assistant, woven directly into your workflow — answering questions, setting tasks, and turning uncertainty into decisions in seconds.

Analyze documents. Get answers. Automate tasks. Send messages. Build interactive dashboards. And when you're on the move, just speak to it — Inception Claw is always with you, on mobile or desktop.

Built for organizations that can't compromise: enterprise-grade security, compliance, and data residency for regulated and sovereign environments.

Save time. Get answers. Move faster.

KEY CAPABILITIES

DEPLOY WITHOUT SECURITY DEBT

Go live with enterprise-grade controls from day one.

PERSISTENT ORGANIZATIONAL MEMORY

Connects to company knowledge and retains context across sessions, users, and workflows

8-LAYER SECURITY MODEL

- Agent-as-Employee Isolation
- Curated Skill Marketplace
- Human-in-the-Loop Inbox
- Tiered Skill Risk Model
- Zero-Trust Network Access
- Managed Secrets Vault
- Infrastructure Isolation
- Prompt Injection Defense

REMOVE COMPLIANCE RISK

Built-in guardrails, audit logs, and human-in-the-loop approvals ensure every action is controlled and aligned with regulatory requirements..

SOVEREIGN BY DESIGN

Sovereign-compliant by architecture not configuration.

WHO IS INCEPTIONCLAW FOR?

CORPORATE

Enterprise Operations

IT cannot govern credentials, audit actions, or control spend. RBAC, immutable audit logs, budget guardrails, and MCP integration — deploy AI workforce at scale without losing control.

GOVERNMENT

Public Sector & Sovereign AI

Sovereign compliance, data residency, and G2G trust are non-negotiable. On-prem cryptographic sovereignty, UAE Pass integration, and digital agentic embassies for sovereign data control.

NATIONAL SCALE

UAE & G42 Ecosystem

One governed backbone for all G42 affiliates — unified fleet command center and foundation for 1 billion digital agents at national scale.

WHY INCEPTION

Proven at Scale

Live across government and enterprise ecosystems — deployed and trusted at national scale.

Sovereign Intelligence

Full data control with compliant architecture — intelligence you own and control.

Frontier Innovation

Proprietary models including the world's first Arabic LLM — innovating at the edge of AI.

G42 Power & Precision

National-scale infrastructure and delivery capability — the power of G42, the precision of Inception.

Inception is AI-native from the ground up, transforming world-leading research into Live, sovereign deployments at the core of governments and enterprises. We are the intelligence layer of the G42 Intelligence Grid, turning data into decisions that drive real-world impact. Our intelligence fabric comprises a portfolio of AI-native products and solutions, enabling leaders to operate with certainty, act decisively, and deliver outcomes at national and enterprise scale. AI-native. Human-led
